

SOLIDWORKS STUDENT ACCESS

For design beyond the classroom

CAFE

LIBRARY

DORM

ANYWHERE

Do your students want to use SolidWorks outside the classroom, day or night? Do they work with other departments or collaborate on projects in other cities or countries? Are your computer laboratories over crowded? Do you offer classes online?

SolidWorks Student Access enables you to connect your students to the SolidWorks software tools they need for engineering design, simulation, sustainable design, and documentation, even when they're not in the classroom. Now they can turn their new ideas into completed designs anywhere, anytime.

► **BENEFITS**

The SolidWorks® Student Access Initiative enables SolidWorks Education Edition customers to give their students access to SolidWorks software outside the classroom or laboratory. Using innovative licensing techniques, SolidWorks Student Access gets SolidWorks software directly into the hands of your students.

SOLIDWORKS IS THERE FOR YOUR STUDENTS
WHEN INSPIRATION STRIKES.

With SolidWorks Student Access, your students can—

- complete their projects from anywhere on campus, from the dorm, from home, or from other working venues
- prepare for the Certified SolidWorks Associate (CSWA) exam
- build their project design portfolios to stand out in the classroom and in the job market

The SolidWorks Student Access Initiative is designed for students and educators who use the SolidWorks Education Edition at their school. SolidWorks Student Access is available to qualified educational customers with active Subscription Service and a basic level of Classroom or Campus network solution.

Get SolidWorks Student Access today! Contact your Value Added Reseller directly for qualifying information.

SolidWorks Student Access is limited to qualified educational customers. Please contact your Value Added Reseller directly for further qualifying information.

I am a student at Worcester Polytechnic Institute and use SolidWorks for everything I need to design, especially my senior design project for a medical device company. I've developed my SolidWorks skills by using tutorials and other resources which earned me invaluable internships. Overall, learning SolidWorks has helped me to gain professional experience in the field of Engineering before graduation.

- Kushlani Sellanhennege

I am a student at the University Of Massachusetts Amherst and use SolidWorks for everything I need to build, create, and show off. I have over six years of experience using SolidWorks and learned through professors, as well as, the SolidWorks tutorials. With the SolidWorks certification program, I have achieved my CSWA and CSWP. I have not only gained an advantage amongst my fellow classmates by using SolidWorks but also against students around the world fighting for a job after college.

- Greg Margolis
